Tractors and Trucks

Sticker Activity Book

How to use this book

Pull out the sticker sheets and have them with you when you look at each page.

Read the words on the page and look at one of the sticker shapes. Do you see a sticker that fits?

When you are sure you have found the right sticker, carefully peel it off and stick it down.

Look at the close-up pictures down the side of the page and see if you can decide where they belong.

Each sticker sheet contains extra stickers. You can stick them on the pages of this book or use them to make your own pictures.

With thanks to Lene Holmen,
Helen Parker and Andy Snaith.

Tractors

Slow and strong, tractors are good at pulling. Farmers use them in the fields to plant seeds, feed crops and plow the soil. Do you know why tractors have such big back wheels?

Can you
spot these?

The cab keeps the tractor
driver safe and dry.

Tractors have a hook
at the back for towing
farm machines.

A chimney lets out the
smoke from the engine.

Thick ridged tires help the
tractor grip the ground.

Tractors are
used on farms
and in forests.

Big back wheels help the tractor
move over bumpy ground.

Mirrors help the
driver see what's
behind him.

The cab has windows on all
sides so the driver can see out.

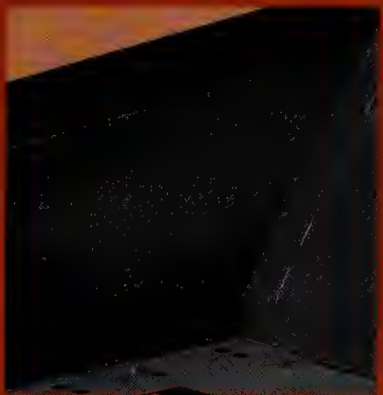

Smaller front wheels make
the tractor easy to steer.

Loaders and lifters

Loaders are tractors with a shovel at the front. They lift soil and sand and load them onto trucks. Forklift trucks lift loads with metal forks – can you see any here?

Can you spot these?

Forklift trucks have a metal fork that moves up and down to lift boxes called pallets.

The shovel tips up and down.

The roof stops things falling onto the driver.

The long arm moves the shovel high and low.

Some loaders also have a digging arm so when they dig a hole they can load the earth straight onto a truck.

Forklift trucks load and unload trucks.

Diggers and shovelers

Long-armed diggers and big, noisy bulldozers dig holes and move earth ready for building houses and roads. Some move on caterpillar tracks instead of wheels – do you know why?

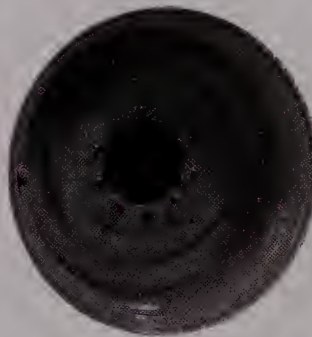

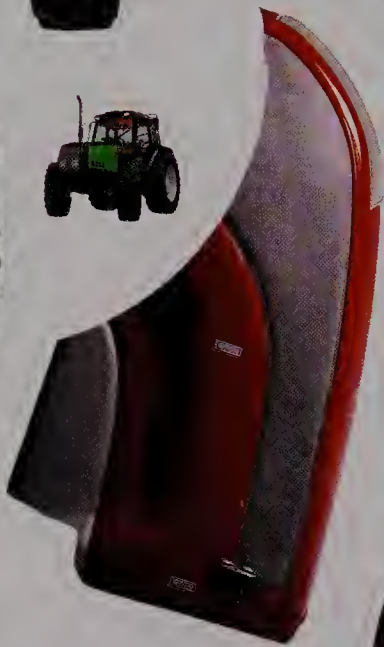

The biggest earth movers weigh more than a thousand grown ups.

The bulldozer's scoop is called a blade.

The digger's cab can turn in a full circle.

Stickers to use on pages 2, 3 and 4 –
and extras to stick where you want.

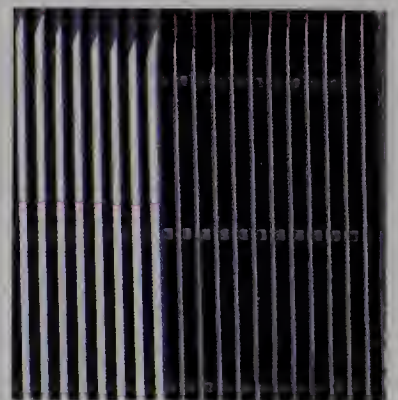

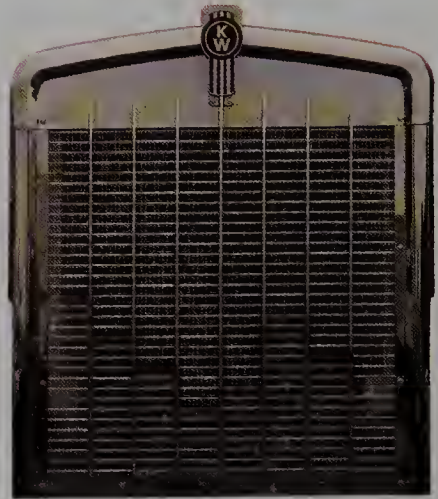

Stickers to use on pages 5, 6 and 7 –
and extras to stick where you want.

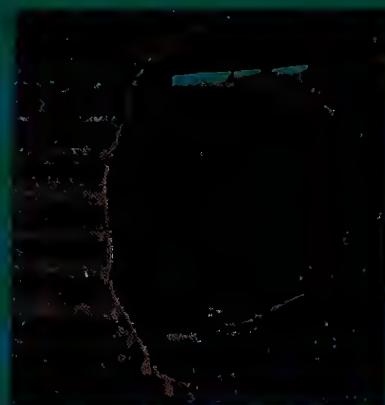

Stickers to use on pages 7, 8 and 9 –
and extras to stick where you want.

A collection of various yellow and orange construction vehicle stickers, including dump trucks, bulldozers, and a large excavator, arranged on a white background. The stickers are of different sizes and orientations, some showing the side of a vehicle, others the front or back. Some have text like "2 Tonic" or "Hi Swivel". There are also smaller stickers of individual components like wheels and buckets. A large, dark, rectangular sticker is also present in the upper right.

Stickers to use on pages 9, 10, 11 and 12 –
and extras to stick where you want.

The real name
for a digger is
an excavator.

Trucks with big
shovels carry soil
and rocks.

Can you
spot these?

The "claw" at the back of
the bulldozer is called
a ripper and is used for
breaking rock.

The bulldozer's blade clears a
path through soil and mud.

Heavy, ridged caterpillar
tracks do not get stuck
in soft earth.

Dumpers

Dumpers carry loads around on building sites. There are little dumpers for small jobs and big heavy dump trucks for big jobs. Do you know where the dumper's skip is?

Dump trucks move earth to and from the building site.

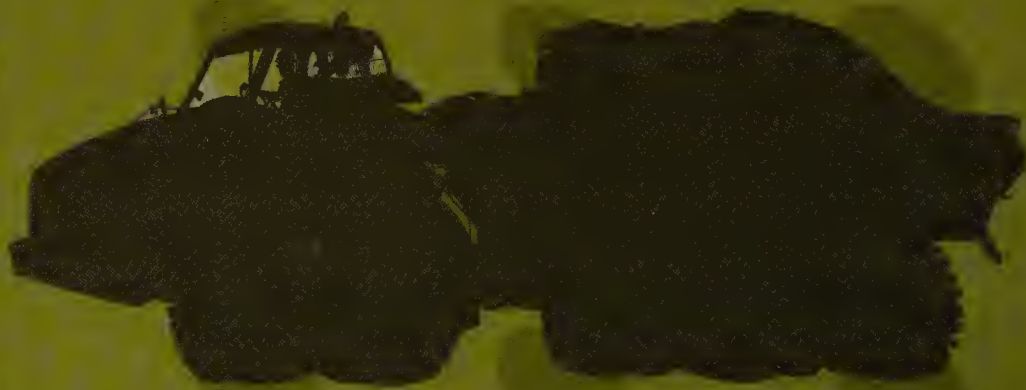

Can you spot these?

A dumper's scoop is called a skip – it can move up and down as well as twisting around.

Large dump trucks carry gravel or sand to the building site.

The engine is right under the driver's seat.

Dumpers have big, ridged tires for moving over bumpy ground.

A metal hoop stops the driver from being hurt if the dumper tips over.

The skip can tip forward to empty its load.

Large dump trucks are used for building roads.

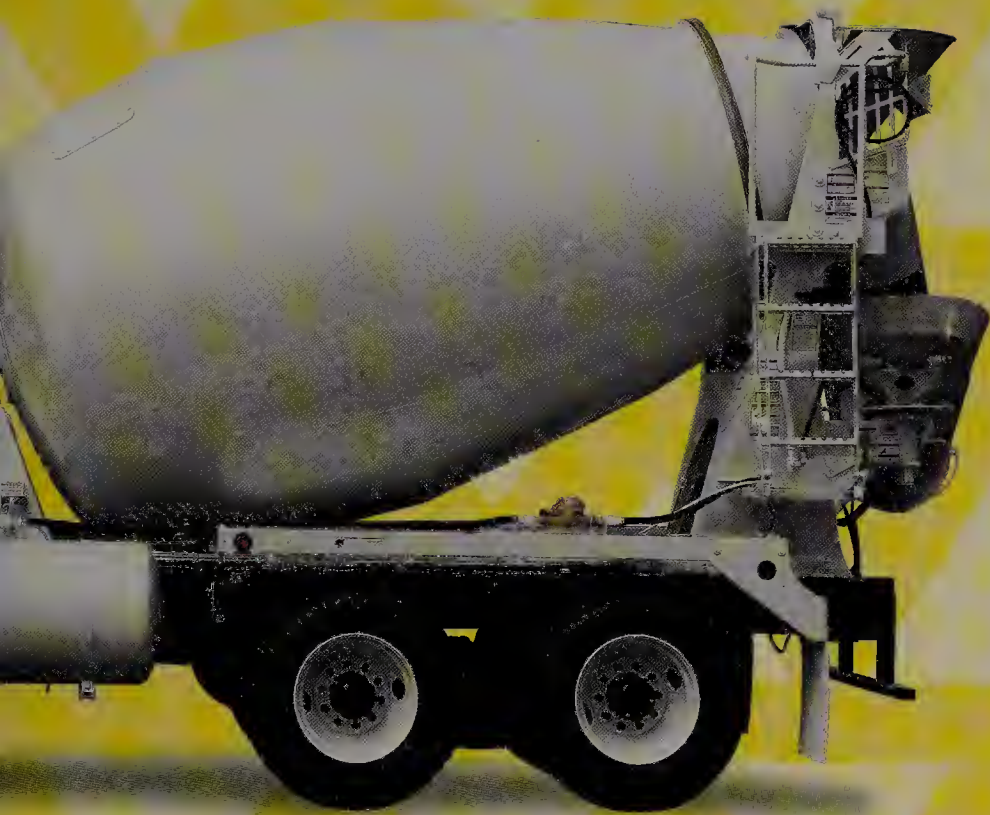

Trucks

Big trucks carry heavy loads on busy roads all over the world. Most trucks have a cab at the front which pulls a trailer behind it. Do you know where the driver sleeps after a hard day on the road?

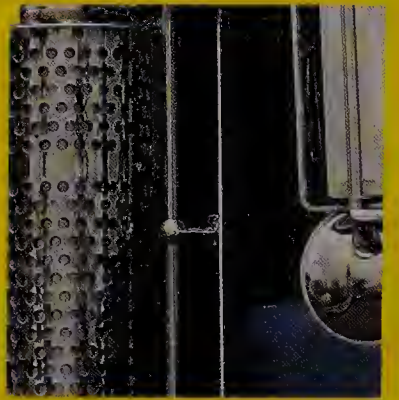

Long-distance trucks have space behind the cab where the driver can sleep.

The driver needs steps to climb up into his cab.

A cement truck
can mix cement
as it moves.

Can you
spot these?

Smoke from the
engine escapes
through two tall
chimneys.

Big trucks have lots of wheels
to carry heavy loads.

Truck lineup

Trucks come in all sorts of shapes, sizes and colors. Can you find which sticker matches which truck to complete your own truck lineup?

Mirrors on the side of this red cab help the driver see behind.

The green cab has only one chimney.

This white cab has a window at the back.

There is room behind this white cab for the driver to sleep after a hard day's drive.

This blue cab has two chimneys.

Tractors and Trucks Sticker Activity Book

Learn all about your favorite tractors and trucks as you complete this colorful, photographic sticker book.

Have fun seeing if you can match the close-up photographs with the right trucks on each page.

More than 80 full-color stickers of tractors, trucks, diggers, loaders and dump trucks.
